

DMD

LANDFILL ENVIRONMENTAL MANAGEMENT

PEBSHAM LANDFILL SITE

Project: Construction of Cell 2A and 2B
Client: Biffa Waste Services
Start Date: July 2010 and August 2011
Duration: Cell 2A 19 weeks and Cell 2B 14 weeks
Approximate Value: £1million
Form of Contract: NEC 2nd Edition Option D
Consultant: SLR Consulting Ltd

THE WORKS INVOLVED

- Excavate approximately 140,000m³ of clay and soil to create a new waste containment cell
- 25,000 m² Geomembrane installed
- Construct a new site haul road to access Cell 1
- Construct an interface lining system between Cell 1 and the old closed landfill site
- Create a new surface water scheme to the stockpile area

OUTCOME & BENEFITS

DMD Plant provided added value to the client; by exploiting their vast experience they coordinated the works to ensure that the double handling of material was kept to an absolute minimum throughout the project.

A high degree of control and efficiency was maintained at all times by utilising DMD Plant's own employees and plant.

Regular communication with the client and consultant ensured the project was delivered in a timely manner and on budget.
